## Regulation (EG) No. 1907/2006

### REACH – Registration, Evaluation and Authorisation of Chemicals

Dear Ladies and Gentlemen,

Regulation (EC) No. 1907/2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals of 18.12.2006 aims to simplify chemicals legislation throughout Europe and enable the safe handling of chemical substances. REACH stands for Registration, Evaluation and Authorization of Chemicals. Since June 2007 the regulation has governed the registration, evaluation and authorization of chemical substances.

The EU-based suppliers of substances and mixtures that are processed in our products in relevant quantities are obliged under the Regulation to inform us if the substances or mixtures they supply contain “substances of very high concern” -SVHC) in a mass concentration of more than 0.1%. The current list of “substances of very high concern” (SVHC) can be viewed on the website of the European Chemicals Agency (ECHA) (<https://echa.europa.eu/de/candidate-listtable>).

In its own interest, in the interest of safe handling of chemical substances and in the interest of high product safety, Gestaguss-GEW Edelstahlgießerei GmbH always takes its obligations under Regulation (EG) No. 1907/2006 very seriously. Should one of our suppliers nevertheless inform us accordingly and we become aware in this way that our products may also contain “substances of very high concern” (SVHC) in a mass concentration of more than 0.1%, we will inform you immediately in accordance with the requirements of Art. 33 of Regulation (EG) No. 1907/2006.

Should you have any further questions regarding the implementation of Regulation (EG) No. 1907/2006 in our company, please do not hesitate to contact us.

Yours sincerely

Gestaguss-GEW Edelstahlgießerei GmbH
